

JackHammer Cabinet Wash Powder for Aluminum...

It used to be that caustic soda was used to blast engine parts clean. With the advent of manufacturing lighter vehicles, the industry has gone to aluminum, zinc and brass engine parts. Jackhammer Cabinet Wash cleans all metal parts safely without additions of other expensive chemicals. It is a great choice for engine blocks, heads, valves and radiators. Can be heated - 120°F to 140°F to control foam and improve cleaning.

Target Applications:

- Spray cabinets, parts washers, soak tanks, agitation tanks
- Metal parts, tools, engines, automotive parts

Use directions:

- Use 4 to 8 ounces per gallon of water.
- Soak or spray parts .
- Can be heated - 120°F to 160°F to control foam.
- Brush, agitate or wipe as needed
- Rinse as needed.
- Skim grease and oil from solution surface as needed.

Note: eye protection, gloves and protective clothing should be worn if the operator could be exposed to the solution.

Key Features		=	Key Benefits	
Special wetting agents	=		Improved soil penetration	
Water conditioner package	=		More effective cleaning & rinsing	
No solvents	=		Clean air	
No NPE	=		Environmentally friendly	
Biodegradable	=		Environmentally friendly	
No caustic soda	=		User friendly	
Emulsifiers	=		Soil releases from surface	
Controlled foam	=		No foam build-up	
Product Specifications				
pH undiluted	=		Not applicable	
pH (1% solution)	=		11.5 – 11.9	
Appearance	=		White powder	
Odor	=		Mild	
Pounds per gallon	=		Not applicable	
VOC%	=		0.00%	
Flash point	=		Not flammable	
Biodegradable	=		Yes
