

# **Press Pro™**

## **Silicone Anti-Stats**

### The Bioforce Services Family of Press Pro Silicones...

are extremely effective anti-marking slip agents that incorporate the latest in anti-stat technology for all of your web offset press needs. They are an excellent tool to combat streaking or marking caused by folders, former boards and turn bars. They are also formulated to improve performance during folding, sheeting and slitting operations. These products can be applied via pan rollers or spray bars. This formula is stabilized to eliminate product separation and the growth of fungus or bacteria growth.

#### **Press Pro 6275 Silicone / Anti-Stat...**

Is a silicone anti-stat product designed for use in a wide range of web offset printing applications to improve slip, eliminate marking, reduce static and remoisturize printed material.

#### **Press Pro 6285 Silicone / Anti-Stat...**

Has the same attributes as the 6275 with the increased capability to handle heavier ink coverage and heavier weight paper stock such as cover stock.

#### **Press Pro 62100 Silicone / Anti-Stat...**

Includes the features of the two products listed above with the enhanced ability to deal with those unique printing applications where marking is an extreme issue or problem.

#### **Press Pro Anti-Stat...**

Press Pro Anti-Stat has been designed to be used with the products above to enhance the static reduction characteristics inherent in these products or as a stand alone product where static reduction is your only concern.

#### **Four Press Pro Products...**

That allow you to fine tune your print applications and manage your costs for anti-marking and anti-stat products.
