

SoyLution™

LAYOUT DYE REMOVER

INDUSTRIAL USAGE

FREE OF PETROCHEMICALS & DYES

PRODUCT DESCRIPTION

Bring us your toughest Dyes and Adhesives.

SoyLution is a highly effective, renewable resource-based, ready-to-use cleaning solution that's designed to replace all petroleum-based solvents for removing industrial layout dyes. Ideal for use in cleaning the dyes commonly used in the metal layout process.

PRODUCT BENEFITS

- *SoyLution* can be substituted for your hazardous solvents, mineral spirits, naphtha, D'Limonene and terpene. It's easy to use...just replace your current solvents with *SoyLution* directly into your current system.
- Made with naturally occurring renewable resources and containing no petrochemicals or added dyes and fragrances, *SoyLution* is safe for use in closed environments and does not compromise indoor air quality.
- **NON-TOXIC.** As long as no toxic or hazardous elements are *added* to the solution—and because *SoyLution* is both non-toxic and readily biodegradable—this product can be easily disposed of.
- HMIS (Hazardous Materials Information System) Health 1, Flammability 2, Reactivity 0.

DIRECTIONS FOR USE

- *SoyLution's* directions for use are no different than what your current solvent dictates.
- Can be used as a spray, soak or wipe-on product—as circumstances dictates.
- If rinsing is required, a rinse with warm water is all that's necessary.

PRODUCT INGREDIENTS

This product contains greater than 85% renewable resource non-petroleum, water rinseable soy-based solvent.

FREE OF

Petrochemicals, mineral spirits, naphtha, D'Limonene or terpene products, fragrances or dyes.

SAFETY INFORMATION

See MSDS sheet:
Methyl Esters and Lactate Esters

WARRANTY NOTICE

Seller makes no warranty, expressed or implied, nor accepts any responsibility for any direct or consequential damages beyond the purchase price as seller cannot control user's handling and use, or effect of use.
